

## Covid-19 Secure: ISC Risk Assessment and Action Plan

This risk assessment is based upon the current guidance from the UK Government, Department of Education, Health & Safety Executive, and Department for Business, to ensure that our students, staff, host school staff and members of the wider community are kept as safe as possible. This risk assessment is regularly reviewed in line with government updates and reviews of national and local Covid-19 restrictions.

### Essential safety measures as outlined by the UK Government:

- a requirement that if a person has Covid symptoms they should stay at home and take a PCR Covid-19 test
- strict hand and respiratory hygiene and enhanced cleaning arrangements and Covid-19 health and safety notices to be placed around the site
- active engagement with NHS Test and Trace
- As of Jan 22, an individual who tests positive for Covid-19 can stop self-isolating on day 6, if they have 2 consecutive negative lateral flow tests on day 5&6.
- As of 19 July 2021, a bubble approach is no longer recommended for U18s or adult provision
- From 7 December 2021, any close contact of someone who tests positive for Covid-19 does not need to self-isolate, but must take daily lateral flow tests for 7 days. If any of these tests are positive, the individual must self-isolate immediately. This applies to close contacts who are under 18 or are fully-vaccinated adults, whose vaccinations are recognised under [the UK's inbound travel policy](#), unless they develop symptoms or test positive.
- From 11 February 2022, fully-vaccinated arrivals to the UK and ALL under 18s do not need to take Covid-19 tests to travel to the UK.
- As of 11 February, arrivals to the UK that are not recognised as fully vaccinated will need to book and take a pre-departure and day 2 PCR test with a UK government-approved provider. The individual is not required to self-isolate unless they have a positive test result. If the individual receives a positive test result, they must isolate immediately and book a free NHS Covid-19 PCR test.
- All passengers must complete a Passenger Locator Form before travelling.
- Under 18s & fully-vaccinated adults are treated the same under UK government rules. Fully vaccinated adults must have had a complete course of Pfizer BioNTech, Oxford/AstraZeneca, Moderna, Janssen, Sinovac, Sinopharm Beijing or Covaxin vaccines, or a combination of these, at least 15 days prior to arrival.

### System of controls

This is the set of actions schools must take. They are grouped into 'prevention' and 'response to any infection' and are outlined in detail in the sections below.

#### Prevention:

- 1) minimise contact with individuals who are unwell by ensuring that those who have coronavirus (COVID-19) symptoms or have had a positive Covid test self-isolate and does not attend classes, activities, excursions. Meals are to be delivered to the person's room where they are self-isolating.
- 2) clean hands thoroughly more often than usual
- 3) ensure good respiratory hygiene by promoting the 'catch it, bin it, kill it' approach
- 4) introduce enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents and bleach
- 5) where necessary, wear appropriate personal protective equipment (PPE)
- 6) wear masks/face coverings in indoor communal areas, high traffic areas and on-board school transport. Numbers 1-4 must be in place in all schools, all the time. Number 6 must be carefully considered, and schools must put in place measures that suit their particular circumstances. Number 5 applies in specific circumstances.

#### Response to any infection:

- 8) engage with the NHS Test and Trace process
- 9) manage confirmed cases of coronavirus (COVID-19) amongst the school community
- 10) contain any outbreak by following local health protection team advice Numbers 8 to 10 must be followed in every case where they are relevant.
